LUCIEN BUCZKOWSKI

IT STUDENT

JOB OBJECTIVE

I am a 2nd university year student in computer sciences, my goal is to work as a web developper.
I am interested a lot in front-end developpement, who combine many things I like as coding, creating, designing visual and virtual content. Even if I can get lost sometimes, I often need a sngle example to solve my current problems. Even if my skills are not that high, I can make some really good work when I take the time to do it.
